

Get Registration Link

When logged in user is SuperAdmin (Powrs employee)

When creating link for **GroupAdmin**:

Posted payload for Group Admin:

```
{
  "parentOrgName": "Powrs",           //MUST BE "Powrs"
  "newOrgName": "New organization",    //mandatory
  "newOrgClientType": "Medium",       //mandatory
  "newUserRole": "GroupAdmin",        //mandatory
}
```

When creating link for **ClientAdmin**:

Parent Org name can be “Powrs” or some other company i.g. “2DSoft”. If parent org name is “Powrs”, **newOrgClientType** is mandatory, **newOrgName** will be saved as empty string and will be populated when new user ApplyForLegalId

Posted payload for Powrs client admin:

```
{
  "parentOrgName": "Powrs",           //mandatory
  "newOrgName": "",                   //string.empty
  "newOrgClientType": "Medium",       //mandatory
  "newUserRole": "ClientAdmin"        //mandatory
}
```

If parent org is another company, i.g. “2DSoft”, then: **newOrgClientType** will be collected from **db.OrganizationClientType**, **newOrgName** will be saved as empty string and will be populated when new user ApplyForLegalId

Posted payload for "2DSoft" client admin:

```
{
  "parentOrgName": "2DSoft",          //mandatory
  "newOrgName": "",                   //string.empty
  "newOrgClientType": "",             //string.empty
  "newUserRole": "ClientAdmin"        //mandatory
}
```

When logged in user is GroupAdmin (i.g. “2DSoft”employee)

Group admin can ONLY create Client admin. Group admin org will be set as new users parent company and all necessary data will be collected from group admin org details.

Posted payload when group admin creates link for client admin:

```
{
  "parentOrgName": "2DSoft",    //mandatory and must be equal to SessionUser.orgname
  "newOrgName": "",            //string.empty
  "newOrgClientType": "",      //string.empty
  "newUserRole": ""           //string.empty
}
```
